ABOUT

Since 2010, SANA has been guided by a firm philosophy that a company main assets is the measure of trust that can be built with both suppliers and clients, throughout this trust, reliability and confidence, SANA having 250 employees that role in the development, enhancing of Iraq and commitment to excellence corporation in all aspects of operations. SANA main objective is to continue contributing to the modernization of Iraq, with a focus on the needs of the future and to fostering of relationships with clients, suppliers, business partners and staff strongly support our work.

CHAIRMAN MESSAGE

CHAIRMAN MESSAGE

It is my pleasure to present you our company profile. Our company's success has been built by a strong relationship with our clients. Our overall strategy is to invest in projects that generate long-term value and to add further value for individual needs of our clients throughout the country by using our high experience which we have acquired through

”

new technologies and achievements. We, as a company enjoying the work we do, are always proud of the projects that we complete and our mission is to be identified as producing projects that benefit the general public. By doing the right job in the right way with the spirit of looking for the coming years of company's success and beyond. We will continue to strive to be an efficient, safe and responsible member of our community.

Our vision aim is to be one of the leading EPC Companies in Iraq, by providing Engineering, Procurement and Construction (EPC) solutions and proven technologies in the fields of Oil and G35, Power Generation, Mining & Steel Construction for providing the best services to Our Clients and Society One of SANA Company's sided is to do the work with high quality and maintain the safety of all employees and return to their families safely,

Our mission and commitment to future generations; It is to ensure a sustainable environment for all living kinds and present our values for the society and provide timely and cost effective solutions to our Clients, while maintaining a relentless focus on safety and uncompromising standard of quality.

WHY TO CHOOSE US ?

We are a leading diversified company carrying out local construction, engineering, procurement, development and investment activities. We are committed to providing reliable, friendly and professional service to our valued customers, being supportive of local businesses and social activities, being environmentally friendly as well as being proactive in the social and economic environments in which we operate. Our appreciation for the interests of our clients, which is evidenced by meeting their requirements and ensuring high quality work, is the main directive of our management.

“Unique Culture“

We are proud to emphasize that our company culture is not only exceptional, but also vital to Mutheth Al Taqa’s continuous progress and resilience. Mutheth Al Taqa’s impeccable achievements were not attained by mere luck but by unrelenting hard work. Nevertheless, the decisive factor all through the decades manifests itself in the set of Al Taqa. The distinctive culture embedded in Mutheth Al Taqa is based on Family Values of

Integrity, Loyalty, Humility and Honesty. The sense of belonging employees experience and the prevailing family atmosphere, inevitably leads to a stimulating, vibrant and dynamic environment, despite its geographical spread.

WE ARE BUSINESS

Construction Services

It includes all civil works such as the construction of roads and the construction of residential and commercial buildings.

Mechanical Services

It includes the installation and maintenance of pipes, pumps and valves, as well as all kinds of welding services.

Electrical Services

It includes the maintenance of electrical stations of all kinds, installation of columns and laying cables, in addition to equipping the stations with materials from international origins.

Mechanical work

Piping system is the most effective and commonly used way of carrying fluids in the industry and represents the main industry system, SANA main SOW is Process Piping erection and installation, we are the best known Contracting company having Completed many utility high thickness Piping projects in Iraq, these projects include internal / external pipe Coating, Insulation & Cathodes Protection Stud Bolts Torque & Tension.

Bolt Tensioners Bolt tensioners work by preloading the bolt, stretching it before the nut is tightened. The tensioner is clamped to the bolt's threads and pushes against the flange in the surface being bolted. This provides a very consistent amount of stretch to the bolt, ensuring consistent bolt stretch and clamping force. The drawback to bolt tensioners is that they must be selected specified to each application, much more data must be compiled and considered in the selection of a tensioner.

Civil works

SANA have a Well trained and team with high experience and reputation in designing and implementing civil works. The company has all the necessary equipment and supplies to perform civil works in the highest quality and safety according to Global Standard Specifications

Storage Tank

SANA ALAMAR is a leading storage tanks EPC contractor in Iraq with complete in house facilities for full turnkey projects from design, detailed engineering, procurement, fabrication of tank plates and appurtenances, to site erection, installation of interconnecting pipeworks, electrical connection, instrumentation, painting and lining or coating. We have all the required equipment's for storage tanks construction including special ones such as automatic Girth welding AGWII which used for horizontal welding in huge storage tanks to reduce construction time and cost.

Sana AlAmar Company has the largest workshop in DhiQarGovernorate and has a specialized and professional cadre in many mechanical and civil fields, as well as specialized in the manufacture of water and oil tanks, according to the required plans and designs.

- Our competence on substation construction are the following ones:

- 1-Installation of components of outdoor substations
- 2-Installation of 132&33 kv outdoor switch gears
- 3- Installation of 132&33 kv indoor switch gears
- 4-Installation of power transformers
- 5-SF6 gas filling
- 6- Installation of Surge Arrestor
- 7-Containerized electrical substations installation
- 8-Testing and commissioning of indoor &outdoor switchgears
- 9-Testing & commissioning of protection relays
- 10-Automation and SCADA control systems installation
- 11- Installation of auxiliary power backup
- 12-High voltage substations installation
